[COASTALPODIATRY.COM](http://COASTALPODIATRY.COM)

Many are aware of the risk factors of heart disease. However, fewer are aware that the blockages that can cause heart disease affect more than coronary arteries—they can also affect other arteries throughout your body.

Testing can help determine if you have peripheral arterial disease (PAD) and whether medical or surgical treatment is necessary. [Coastal Podiatry Associates](#) utilizes a state-of-the-art vascular testing device known as PADnet that enables earlier disease detection and accurate risk assessment for PAD.

[Learn more about PAD and take our questionnaire.](#)

**We're here to help you keep your feet feeling their best.**

Each doctor with Coastal Podiatry Associates specializes in state-of-the-art foot and ankle care and is Board-Certified by the American Board of Foot and Ankle Surgery. Together they have decades of combined experience and are trained in advanced surgical and nonsurgical podiatric solutions. Their goal is to provide you with gentle, optimum quality foot care at

affordable prices and to deliver their care in a compassionate and conservative manner.

Personalized treatment programs are developed to satisfy individual foot care needs.

---

**Strawberry + chocolate = the perfect pairing**

Greek yogurt gets studded with fresh strawberries and chocolate chips and then frozen so you can break it into chunks just like chocolate bark (but healthier!).

---

### **Swelling in your feet or ankles?**

We understand that experiencing any form of swelling can be concerning. That's why it's important to seek medical attention to determine the underlying cause and receive proper treatment if necessary.
